

PACIFIC GRO

Seafood for the Soil

Oceanic Hydrolysate

2-1-0.3

WITH CRAB AND SHRIMP

For Organic Use

Bulk

PACIFIC GRO

Oceanic Hydrolysate

General Usage and Application Rates

Shake well before mixing with water

Dilution rate: 30:1 (1/2 cup per gallon of water)

Since it feeds the soil, post harvest application is also effective.

Lawns - 3 gallons per acre or 1-1/8 cups per 1000 sq. feet, 2 to 4 times per year (in spring, summer and fall).

Vegetable and Flower Gardens - 4 gallons per acre or 1-1/2 cups per 1000 sq. feet, 3 to 6 times per year.

Compost & Potting Soil - 4 to 8 cups per cubic yard.

Trees & Shrubs - Mix 1 cup per gallon, fill several holes bored in ground near drip line, or apply 1-1/2 cups per 1000 sq. feet of landscape, 1 or 2 times per year.

Farming Acreage - 15 to 60 gal/acre per year, depending on value of crop, nutrient demand and fertilization program. Generally 5 to 15 gal/acre per application. Post-harvest application is particularly effective.

Berries & Orchards - 40 to 60 gal/acre per year.

Foliar - 1 to 3 gal/acre.

Consult with a crop consultant, experienced farmer or other professional for specific guidance.

Use with Caution: Wash with water any contact with body.
Do Not Store diluted product, use up all that you mix.

Seafood for the Soil

-  Made from micronized shrimp and crab and other seafood waste
-  Cold processed hydrolysate
-  Low odor formulation
-  Screened to 200 mesh for trouble-free spray and drip application
-  No oils removed, allows for soil lock and foliar sticking
-  Good food product promoting beneficial microbial activity, especially fungal.

GUARANTEED ANALYSIS

Total Nitrogen (N) ----- 2.0%
0.9% water soluble nitrogen
1.1% water insoluble nitrogen
Available Phosphate (P₂O₅) ----- 1.0%
Soluble Potash (K₂O) ----- 0.3%

 Derived From Seafood protein hydrolysate

Density at 68 F: 9.2 lbs/gal (1.1 kg/liter)
